Mittler Brothers Machine & Tool was founded in 1980 by Mike and Paul Mittler to meet the needs of the specialty and precision machining industry by providing excellence in quality and customer service. From its humble beginning Mittler Brothers has grown steadily to 60+ employees and a 50,000 sq. ft. modern manufacturing plant. We serve major industries worldwide, including automotive/truck manufacturers, consumer products, medical, and general industries. We are motivated, take pride in our work and consistently achieve positive results. Some things never change, like our philosophy of taking care of the customer! This may be new to some businesses, but it is a way of life at Mittler Brothers. We acknowledge our customer's needs with a manufacturing process that emphasizes safety, quality and productivity. Our goal for the future is to continue producing quality work, quickly and efficiently, while delighting the customer.

We are a Full Service Shop

Performing Turn Key Projects

From Concept To Finished Machines

**Non-Synchronous Assembly Line
For 3 Part Family**

In today's market quality, cost, and throughput have become the most important factors in industrial manufacturing. We have a team of well trained American engineers and fabricators working every day to make each project a success. Increase production speed and enhance your efficiency. Contact Mittler Bros. Machine & Tool for your next project, we provide creative solutions and effective designs.

ENGINEERING & DESIGN

We have an in-house engineering department equipped with the latest CAD/ CAM technology. Our team of engineers use SolidWorks 3D & AutoCAD to make in depth realistic models of the project at hand.

Mittler Bros. will work closely with you, to meet your needs first hand, and produce precise, efficient designs.

Our staff is experienced in mechanical design principles and techniques, pneumatic and hydraulic systems, electrical and PLC programming.

ROBOTIC INTEGRATION

Automation & Robotics are being used more as time advances and our certified technicians are always up to date on the latest technology. We are FANUC Robotics Authorized Integrators, so our engineers receive yearly training on how to program, operate and install various forms of robotic assemblies.

Allow our engineers to help automate your facilities to enhance your production speed and quality.

Rail Car Wheel & Axle Assembly Cell

PRECISION MACHINING

We apply the latest CNC technology to maximize efficiency, optimize productivity, and ensure the highest quality results for our customers. Our highly skilled staff is experienced in machining all types of materials, including steel, tool steel, aluminum, stainless steel, brass, bronze, titanium and exotic materials.

Here at Mittler Brothers Machine & Tool, we work with some of the most trusted equipment to get the job done, no matter how difficult.

FABRICATION & WELDING

We have complete fabrication and welding facilities that include T.I.G., M.I.G. and Arc welding. Our technicians are certified and experienced in welding steel, aluminum, stainless steel and magnesium. We focus on the details while producing the highest quality machines possible.

ASSEMBLY & PAINT

Within our 50,000 sq. ft. facility we have a large area devoted to assembly of large scale projects. Technicians and engineers are hard at work assembling, testing, adjusting and completing industrial machinery.

The Mittler Bros. building also contains both a blast booth and a paint booth to put the final touches on any project. We have well trained painters using the best equipment to paint machines to meet industry standards.
